Reflections on
A Boundary Stela of Sety I

This paper makes available a boundary stela of Sety I, discovered in the desert near the kurkur Oasis\(^1\) which is located 23° 54’ N, 32° 19’ E, about 55 km west of the Nile, south west of Aswan. It is now kept in the inspectorate magazine on Elephantine. It was carved from in a slab of sandstone that was perfectly intact. It displays workmanship of the highest quality in sunk relief. pl. 1., Fig. 1

**Description (Pls. 1,2,3)**
The stela is 80 cm. in height, 45 cm. in width; it is round-topped and divided into two main registers. The upper register is occupied by a scene showing the king bowing before the God Khnum\(^2\) and presenting two nw-vases to him.

Sety I is wearing the bag-wig which is called Khat-headdress, a broad collar, and bracelets. The king also wears the royal kilt with a triangular flap over a second one with a sloping hemline, with the bull’s tail attached to its back belt.(pl.2)

A vertical line of inscription runs behind the king’s head and may read as follows:

(1)

\[
\text{sA anx H.A.f nb}
\]

(1) “Every protection of life behind him.”

Before the king there is an offering stand with a nmst-jar and a large lotus blossom upon it.

Two lines of inscription run on the upper right of the stela as follows:
Nfr-nTr Mn-mAat- Ra sA-Ra stv mry.n-ptH di anx

(2) The good god, Menmaetre, (3) son of Rē, Sety beloved of ptah (4) given life.
To the left side of the upper register the God Khnum with the Atf-
crown stands on a plinth holding the wAs scepter in his left hand
and anx- sign in his outstretched right hand to present them both
to the king. On the left two lines of inscriptions run as follows:

(6)

nb-imntt mry-Hnmw

(5) Beloved of Khnum, (6)lord of west.
On the lower register seven lines of inscription are arranged
horizontally and read from right to left as follows: pl. 3.

Translation:
Year 4, 3rd month of peret, day 20 under the majesty of Horus Falcon, strong bull; appearing in Thebes, Bringing life to both lands, Nebty-ruler, renewing birth. powerful.
Of arm, subduing the nine bows, Golden Horus, repeating epiphanies, rich in forces in all lands. The king of U.L. Egypt, lord of the two lands.
Menmaatre, image of Re, son of Re; lord of appearance, beloved of Ptah. Sety, gives life like Re for ever.
(Long) life the good god who shields millions, a rampart for hundreds of thousands, (who has) a strong heart when he sees the multitude. He rejoices when one remembers
Battle of the sovereign, great of strength, assuming the white crown. He has flourished, portion.
For the two lords (Horus and Sety) like his father Re, the king of U.L. Egypt Menmaatre, image of Re, in this day, now his majesty, his heart is joyful.
While establishing the borders of Ta-Sety (the land of Nubia) his father Re puts in order the two banks while his true son repeats his plans eternally.

Comments:
I 1. Its being found isolated without buildings around, may refer to its transfer from the original area to the present provenance.
I 2. As for the depiction of the bowing position of the king, the present writer would propose that this stela seems to be the first example, which adopts the king's posture amongst all his stelae carved around his fourth year of his reign. This idea is based on the comparison available in his stelae before year 4\(^{(2)}\) (i.e.) Beth shan stela of Y.1, Karnak alabaster stela, Karnak Ptah temple stela, larger Buhen stela and smaller Buhen stela of Y.2.
I 3. According to the idea mentioned above, one would say that this posture has become predominant in his late years of his reign not only in his stelae as such, two Aswan stelae of Y. 9 and Gebel Barkal fragmentary stela in the year 11\(^{(3)}\) but also in the decoration of Sety's temple at Abydos\(^{(4)}\) and in his reliefs carved in the great Hypostyle hall at Karnak, and his speos at kanais. At Gurnah, it is found in rooms where the decoration is done in the name of Sety 1 alone\(^{(5)}\) in comparison with its rarity in the middle of his reign\(^{(6)}\).
I 4. From the artistic point of view, we may observe that the depiction of the bowing position did not allow the artist to follow the canon of shoulder proportion, as it is obvious that the right shoulder is longer than the left one. Moreover, the vertical line which should meet deliberately the intersection of the interior lines of the legs at the groin, has been deviated to fit with the canon of the bowing posture.

I 5. It is also notable that the heel of the king, left foot is slightly raised above the level of the right one, to fit also with the bowing posture of the king. That seems— as far as it is known an unique position in the king’s depiction amongst all his reliefs.

I 6. The king is depiction on the stela may represent symbolically the Htp-di-nsw form as follows: The two vases represent the Htp (offering), while the hands refer to the word di (giving). The king himself represents the nsw.

I 7. The style of the king’s portrait in this stela is notably different from the conventional Ramesside style: as the angle between the straight forehead and the nose is slightly convex. Thus the nose appears in aquiline shape rather than the normal one. As for the lips, they look typically Nubian, since they are much thicker and they form as bulge in the middle of the mouth.

II 1. The writing of the cartouches of Sety I on the stela is conventional, since the sign of the god seth is kept amongst the king’s name. Thus is compared with that in Abydos whereas the sign of seth has been replaced by a figure of Osiris and tit sign, apparently for political reasons.

II 2. In some respect, one would observe that some epithets were added to the king’s prenomen, which were adopted from those of his predecessors T III and Amenhotep III such as tit Rē or iw Rē.

Moreover, the present writer would refer to the combination of the king’s prenomen Mn-Maat- Rē, which combined between the
T III name “Mn-pHt- Rē and that of Amenhotep III Nb-Maat-Rē.

II 3. The stela includes also the king’s titles which were added to the Horus title from the first time in N.K. besides the traditional one; Nekht Ka. Those are xam wAṣt and sanx tAwy\(^{(12)}\).

II 4. These titles would coincide with the orientation of adopting the wHm mswt; the repeating of Birth as a title after the Nebty name (as appears in this stela) rather than a description of the whole reign when it comes after the sign of a year\(^{(13)}\).

II 5. In the word rSw in line 4 of the main text, the sign \(\square\) S is repeated twice\(^{(14)}\), which seems a unique kind of writing that may refer to the enduring joyce besides the calligraphy reason.

II 6. The writing of the word aHA in line 5 is very odd since it is in hieratic style than the hieroglyphic one\(^{(15)}\).

II 7. The reference of the two lords in line 6 emphasises the acceptance of Sety’s cult as mention supra, as the sign of seth is written deliberately rather than the double Horus\(^{(16)}\).

II 8. The calligraphy reason also controlled the writing of m hrw pn (in this day), since the word hrw is abbreviated in one sign \(\square\)\(^{(17)}\).

ملاحظات (أفكار) عن لوحة حدود للملك سيتي الأول:

تتناول الباحثة في هذا البحث نشر لوحة حدود للملك سيتي الأول لم يستبق نشرها وقد عثر عليها بواحة كركر التي تقع على بعد 55 كم غرب النيل في الجهة الجنوبية الغربية من أسوان وهي الآن موجودة في مخازن هيئة الآثار في الفندين.

وتتراوح أطوال اللوحة ما بين 10،000 متر ارتفاع، 45 سم عرض ولها قمة دائرية ومقسمة إلى مستويين أساسيين الأول يمثل منظر للملك سيتي الأول مقدماً إناثين كقرابتين للإله خنوم إله منطقة الفندين الذي يظهر واقفاً في الجهة اليسرى من المنظر مرتدياً ثاج أتف وممسكاً بصولجان الوعاء وعلامة الحياة عنخ ليقدمهما للملك.

وفي المستوى الثاني يظهر نص هيروغليفي مكوناً من سبعة أسطر أغقيّة تقرأ من اليمين إلى اليسار ويتحدث النص في البداية عن العام الذي كتبته فيه اللوحة ثم الألقاب التقليدية للملك سيتي الأول في تلك الفترة كما يعبر النص عن السعادة التي يشعر بها الملك عندما يقوم بتأمّين الحدود الجنوبية لمصر.

وفي الختام تقوم الباحثة بتسجيل بعض التعليقات التاريخية والفنية واللغوية للغة.
